

## ProjectGroup3Afternoon

### **The Team :**

- Alexandros Aristovoulos
- Mohamed Amine Bainine
- Saif Zrari

### **The Website Name :** Stop The Spread

### **The Audience of our website :**

The website is intended for any person looking for reliable information, news and guidelines about Covid-19.

### **The goals and objectives of our website :**

Stop The Spread is a community-based project powered by three volunteers from Greece. It acts as a portal for the public to keep track of the latest news development about the COVID-19. The website is an attempt to fight the spread of misinformation in a time where the facts and integrity of what we share with each other are critically important. Our goal is to provide context by easily displaying facts and figures published by governments and organizations all around the world along with guidelines and safety measures to protect from COVID-19.

## **The Content and functionality of each page:**

Each page will contain a navigation bar to allow the user to move from one page to another.

The element used can be found below :

[How To Create a Responsive Top Navigation Menu \(w3schools.com\)](https://www.w3schools.com/howto/howto_create_top_navigation_menu.asp)

### **Home:**

This page begins with a carousel containing an informative video regarding COVID-19 as well as some useful and interesting links. It will support previous/next controls and indicators for each slide. The user will be able to watch the video and/or click the links to be redirected to their pages.

[How To Create a Carousel](#)

Following that there will be 4 cards, each one will have the preview of an important article regarding the virus. By clicking on any of the cards the user will be redirected to the page from which the article originates in order to view it.

[How To Make A Card](#)

### **News:**

At the start of the page, there will be a carousel with recent news about the coronavirus. This carousel will support previous and next controls as well as indicators. The user will be able to select any article shown in the carousel and they will be redirected to the page from which the article originates.

[How To Create a Carousel](#)

Right after the carousel there will be a heat map regarding the current number of cases of the virus in each country. Ideally by clicking on a country the user will be able to get more information like the exact number of cases or deaths in this country.

Lastly, there will be 3 cards, each with recent data about the total number of cases, deaths and recoveries respectively.

[How To Make A Card](#)

## **About us:**

The top of the page will contain a banner displaying an image (showing the objectives of the website, the name of the page and the website at the bottom).

### **[How To Create a Hero Image \(w3schools.com\)](#)**

Coming next is our team members' names and each one has his social media links.

### **[How To Create a Meet The Team Page \(w3schools.com\)](#)**

To keep visitors informed about the latest news we did add a subscription column requiring first name and last name, date of birth, country and email.

### **[How To Create a Sign Up Form \(w3schools.com\)](#)**

## **Guidelines / FAQ:**

The page will contain a list of guidelines on top of the page (3 Images containing infographics). Below that the page would contain the most frequently asked questions ([source](#)) organized in a form of Collapsibles/Accordion. The element used can be found below :

### **[How To Create an Accordion \(w3schools.com\)](#)**

## **Tasks allocation:**
